2. Installation

Switch off ignition and disconnect the vehicle's battery! If according to factory rules disconnecting the battery has to be avoided, it is usually sufficient to put the vehicle in sleep-mode. In case the sleep-mode does not show success, disconnect the battery with a resistor lead.

1. The video-in-motion interface has to be installed in the back of the navigation unit. It is necessary to unmount the navigation unit.
2. Remove Quadlock connector from the navigation computer and connect it to Harness TV-NTG2.
3. Remove the both 12pin inserts from the original Quadlock connector and connect them together with the optical leads to the Harness TV-NTG2. Connect the TV-NTG2 to the navigation computer.

PCM 3.0

3. Activation of the video-in-motion function

The video-in-motion can be activated and deactivated by Dip 1 or alternatively by the included loose green cable in connection with a switch (not included in delivery).

Video-in-motion permanent

With dip1 to ON the video-in-motion function is activated permanently without disturbing the navigation performance.

Video-in-motion selective

With dip1 to OFF the included green cable is used to activate the video-in-motion function.

Connect a switch to the green cable and connect the green cable to +12V ACC.

- +12V = TV-Free is activated
- 0V = TV-Free is not activated

Note: The loose white cable is not required and must be isolated.
