

3 ACTIVATE AA/CP

To activate Android Auto or Apple CarPlay, please follow the three easy steps below:

1. Tap on the 'X-Link' icon on your car's screen.
2. On your phone, go to the Bluetooth settings.
3. Find and select the T63 device from the list.
4. Tap on 'Connect' or 'Pair' to establish a connection.
5. Wait for the devices to pair and establish a connection.

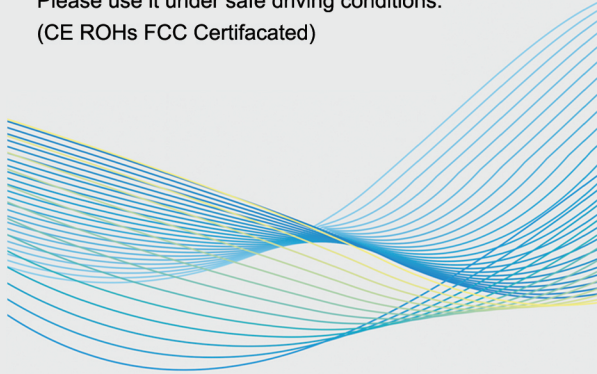

Once the connection is established, you should be able to use the features and functions of the T63 device through your car's screen. If you want to return our software, simply click 'CAR' icon; if you want to go back the original car system, simply click RETURN' icon on our software.

T63 AIR QUICK START GUIDE

Please use it under safe driving conditions.
(CE ROHs FCC Certificated)

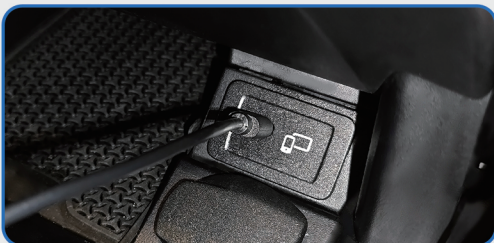

1 CONNECT VIA USB

Insert T63 AIR into your car's USB-A/USB-C port until the indicator light illuminates. Then, follow the steps you typically use to connect your phone to Apple CarPlay or Android Auto to establish the connection with T63 AIR.

if you encounter any connection issues, please ensure that you fully plug in the T63 device into your car's USB port (you'll hear a 'Click' sound) and follow these steps for a stable connection:

1. Disconnect the WiFi and Bluetooth settings on your phone.
 2. Disconnect the CarPlay settings on your phone.
 3. Establish a connection between our device and your car.
- Once our device is successfully connected to your car, you can connect your mobile phone using Apple CarPlay or Android Auto through our software.
